

The Intelligent Foundation for Safe, Standardized, and Insight-Driven Pharmacy Automation

nexus^{Rx} Pharmacy Control Software

“ eMar integration is a unique feature and advantage of the NexusRx software. Rather than scanning a separate barcode for each medication, our staff can scan a single barcode, drastically reducing the number of steps required

Ross Brickley
Neil Medical Group ”

Virtual Release

Flag patient exceptions for review and continue production, eliminating the need to re-start entire orders

Compatibility

Seamless integration with leading pharmacy management systems ensures accurate data exchange and smooth daily operations.

NDC Changes

Authorize NDC changes prior to packaging utilizing built-in guardrails then reconcile the PMS using NDC reports

Dashboards

Real-time visibility into workload, machine status, and exceptions enables smarter decisions and smoother daily operations.

eMar Integration

Cut down administration times by scanning a single bar code rather than individually recording each med administered

Analytics

View packaging and production data, gaining insights into your workflow to systematically improve and enhance production

Safety-First Intelligence

Identify Issues **Before** Production Begins

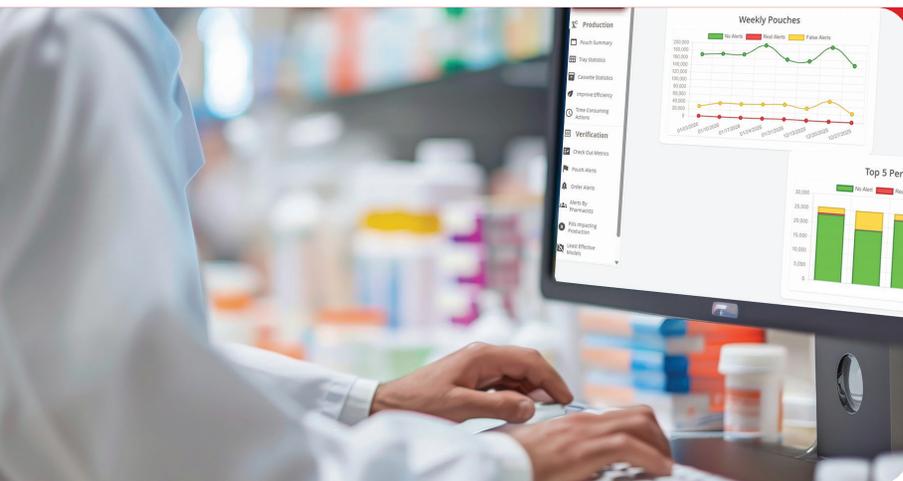

Optimized Order Routing

Real-Time Order Control for Immediate Results

Secure Data Management

Production data managed **where work happens.**

The NexusRx Difference

Noritsu's workflow software links pharmacy management, packaging, verification, and archiving into an integrated system that optimizes operations and safety at every stage of the packaging process
